

C program to display length of string using pointers.

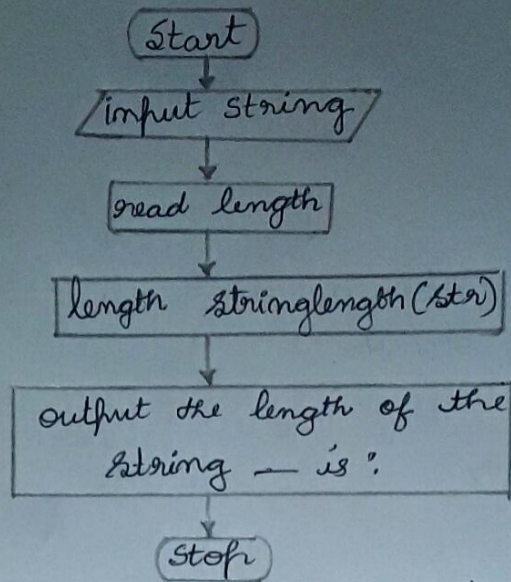

Algorithm:

1. Start
2. Input string
3. Read length
4. $\text{length} = \text{stringlength}(\text{str})$
5. Output the length of string
6. Stop

int stringlength(char *p)

1. Start
2. head count
3. while(*p != '\0')
4. count++;
5. p++;
6. Return count
7. stop.

Flowchart:

int stringlength(char *p)
